You can buy any model by making a small down-payment and arranging easy terms for the balance. Or you can buy on the Ford Weekly Purchase Plan. The Ford dealer in your neighborhood will gladly explain both plans in detail.

## THE NEW BUICK

S. J. Rexrode and F. M. Brill, of Rexrode & Brill, Buick dealers, are in Washington this week to attend the annual meeting of Buick salesmen. A new model Buick was announced July 1. Messrs Rexrode and Brill expect to drive home some of these new cars home. Here follows a detailed description of the new model—

Eight new body models on a chassis of 114 3/8 inch wheel base, embodying a new six-cylinder valve-in-head engine with a three inch bore and 4 1/2 inch stroke, is the sensational announcement made by the Buick Motor Company.

The new six cylinder model is to be known as the Standard Six.

The body model will consist of a five passenger double service Sedan; a Two passenger Roadster; a Two passenger enclosed Roadster with heater; a Five passenger Touring; a Five passenger enclosed Touring with heater; a Two passenger Double Service Coupe; a five passenger Sedan; and a Four passenger Coupe. Probably the most striking features of the new models are the completely enclosed sedan and coupe on the open cars, and the low pressure tires on all models. The cars with the enclosed tops will carry heaters. The tops and sides are so designed that they harmonize well with the distinctive body lines.

They are upholstered with leather, with special cushion springs effecting a high degree of motoring comfort. Other models are furnished with upholstery of durable cloth in pleasing colors.

The engine is a valve in head type with automatic lubrication throughout and with the cylinder head removable. The clutch and transmission from integral parts of the engine which is suspended at three points from the main frame. The crank shaft is a drop forging, extra heavy and balanced with four large bearings. The piston and connecting rods are properly weighted and carefully manufactured. Large valves are operated by noiseless, adjustable push rods through rocker arms which are automatically lubricated from the engine. This engine produces fifty actual break horsepower.

It has pressure feed lubrication to the crankshaft and connecting rod bearings, also to the camshaft and pump gears. The oil pump is of gear type, positive drive, located on the right side of the engine, and driven by worm on the center of the camshaft. It has a maximum pressure of thirty pounds regulated by relief valve. Pump oil screen is reinforced to prevent collapsing. Pistons, cylinder walls, cams, rollers, and the other three camshaft bearings lubricated by mist of oil and oil capacity 4 1/2 quarts. Fan automatically lubricated from reservoir in hub. Water cooling is by centrifugal pump operated from the camshaft by spiral gears. Harrison cellular radiator is employed.

Control is by means of short spark and throttle levers in the center of steering wheel, friction retained. There is a button type foot accelerator with rest. The clutch pedal is easily operated. Long leverage brake pedal and starter pedal conveniently located. Gear shift and emergency brake levers are convenient to the right hand.

The carburetor is the improved automatic float feed type, supplied by vacuum system from the gasoline tank mounted on the rear of the frame. Automatic heat control insures proper vaporization at all speeds. The air regulator and choke buttons are on the instrument board.

Ignition is supplied by the high tension jump spark system, the current being supplied by storage battery and Delco electric generator. The spark advances automatically. The starter is a complete Delco single unit system for starting, lighting and ignition, built as an integral part of the engine and operating in conjunction with the large storage battery. Combination switch with ammeter and automatic circuit breaker is found on the instrument board.

The clutch is a multiple disc, dry plate, requiring but slight pressure to operate. It is very smooth in engagement and very positive in action, and the adjust is particularly simple.

The transmission is the selective sliding gear type, three speeds forward and one reverse. The gears are special and heat treated. There is positive interlocking hand control so easy to operate that the gears can be shifted with the tips of the fingers. Through single, large, improved, automatically lubricated universal joint and fully enclosed propeller shaft, through spiral gears in rear axle, is the drive. The propeller shaft housing connects directly with the rear end of the transmission by ball joint enclosing universal. Strut rods from the front end of the propeller shaft housing to the axle housing keep them in perfect alignment. Both torque and drive are taken through ball joint.

The rear axle is the floating type which means that all the weight of the car is taken on axle tubes and only driving torque is taken by axle shafts. The differential is mounted on high duty ball bearings, pinion shaft on extra large ball bearings, rear wheels on Hyatt roller bearings. Spiral bevel gears are fully adjustable.

The service brakes are Buick type, external contracting, operating on all drums of unusual size and area on all four wheels. The equalizer insures proper distribution of pressure to front and rear brakes. They are easily adjusted for wear—without adjustment very accessible. Hand brake of internal expanding type operating on rear wheel brake drums only.

Drop forged I beam of carbon steel, reverse Elliott type, double heat treated steering knuckles and tie rod yokes, characterize the front axle. Axle especially designed to operate with four wheel brakes. New departure ball bearings for the front wheels.

The wheels are of artillery type with hub flanges. Tires are 31 by 4-95 inches, low pressure, on all models.

The steering wheel is of improved semi irreversible split bronze nut and steel worm with large adjustable ball bearings to take up wear. Steering wheel 17 inches in diameter, short spark and throttle levers in center of steering wheel. Horn button on top of steering post.

The frame is of reinforced pressed steel channel, section, exceptionally stiff and deep side members. Four heavy cross members. Integral gasoline tank support and spare tire carrier.

The front springs are semi-elliptic type. The rear, cantilever type, both being exceptionally long, specially heat treated and adapted for each body type. Tops on open cars have a new design quarter curtains, made of special waterproof fabric. Inside operating side curtains open with doors. Models with permanent tops, sides enclosed by glass windows adjustable for ventilation. Enclosed models with stationary type tops with windows adjustable.

Model 24, 24-A, 25, 25-A, have two piece ventilating type windshield with inside operating, adjustable friction stops to hold glass in position. These models are equipped with cowl ventilators and windshield wiper. All closed models equipped with sunshade, automatic windshield wiper, new style one piece windshield easily raised or lowered for ventilation by handle in similar manner to windows.

All the models have been equipped with a drip pan for the carburetor, and completely insulated wiring, which, with the attention to other details approved by the insurance underwriters' laboratories, entitles Buick owners to the lowest rate for fire and theft insurance.

As standard equipment on all models are carried dim and full headlights with antiglare lenses. Parking lights in cowl, tail lamp and instrument board lamp. Motor driven horn. Seventy-five mile speedometer. Gasoline gauge. Tire carrier with extra demountable rim, jack, new type high pressure grease gun, full kit of tools, pump, tire repair kit, transmission lock, cowl or windshield type ventilator, rear vision mirror, running board scuff plates, new sunshades and dome light on all closed models, windshield wiper, automatic windshield wiper on all closed models.

Let George make it. George is any farm boy of high school age. He has already built 200,000 of the quarter of a million radio sets now in use in farm homes in the 48 states. Home sets costing less than \$6 are very satisfactory. Send a 10 cent coin to Superintendent of Documents, Government Printing Office, Washington D. C., and request Standard Circular Nos. 120 and 121 which will give full directions. Request also a copy of Price list 64 and look for other documents under Radio-Telegraphy.

### FROM HIGHLAND RECORDER

The Methodist parsonage, Monterey is this week the scene of a partial reunion of the Wyand family of which the pastor is a member. The visiting relatives are Dr. S. S. Wyand and wife, of Minnesota, Mr and Mrs. C. C. Hoffmaster of Hagerstown, Md., and a niece, Miss Francis Baker, of Belmont, Iowa. Dr. and Mrs. Wyand and niece motored through to Hagerstown where they were joined by the sister and her husband and where Rev. F. B. Wyand, Monterey met them. The visiting minister filled his brother's appointments here and at Rehoboth last Sunday, his splendid sermons being listened to by fairly large audiences.

### ALLEGANY CLUB NOTES

Auditor John C. Bond, A. B. McCrum, J. V. Sullivan, Freeman Carter and G. W. Sharp, of Charleston, were fishing at the Club last week and had good success.

### SHOE REPAIRING

I have opened a general shoe repair shop in the Brill Building at Cass. I am prepared to do neat work promptly. Special attention to mail orders. J. S. Bennett

## Gained Ten Pounds

Mrs. George S. Hunter, of Columbus, Ga., says she suffered severely with female troubles.

"I had to go to bed and stay sometimes two weeks at a time," says Mrs. Hunter. "I could not work. My... were irregular and I got very thin. I went from 126 pounds down to less than 100. My mother had been a user of

# CARDUI

The Woman's Tonic

and she knew what a good medicine it was for this trouble, so she told me to get some and take it. I sent to the store after it and before I had taken the first bottle up I began to improve. My side hurt less and I began to mend in health. I took four bottles in all during the last ten months. Cardui acted as a fine tonic. I am well now. I had gained ten pounds and am still gaining. My sides do not trouble me at all and my... are quite regular. I know that Cardui will help others suffering from the same trouble." Take Cardui. E-101

## Notice

Uriah Bird, Executor of the last will and testament of J. W. Kirkpatrick, deceased

Bank of Marlinton a corporation and others

Notice is hereby given that pursuant to a decree of the Circuit Court of Pocahontas county, West Virginia pronounced on the third day of June 1924 in the above entitled cause I will on the 8th day of August, 1924, at my office in the town of Marlinton, West Virginia, proceed to take state and report the following matters of account referred to me in said decree.

First—What personal estate J. W. Kirkpatrick owned at the time of his death, the character and value thereof.

Second—What deposition if any was made of said personal estate by the plaintiff Uriah Bird, executor of J. W. Kirkpatrick deceased, how much if any of said personal estate is now in the hands of the said Uriah Bird, executor, available for the payment of any debts owing by the estate of the said J. W. Kirkpatrick, deceased.

Third—A settlement of the administration of the said estate of the decedent by the said Uriah Bird, executor.

Fourth—What debts the said J. W. Kirkpatrick owed at the time of his death, to whom they are payable their nature, their respective amounts and priorities.

Fifth—What real estate was owned by the said J. W. Kirkpatrick at the time of his death, its quantity description, location and value.

Sixth—Any such other matters as any party in interest may require, the same being pertinent or such other matters as said commissioner himself may deem pertinent whether so requested or not.

At which time and place you may attend and do what is necessary to protect your interests.

N. C. McNeill  
Commissioner

6 wks.  
To the creditors of J. W. Kirkpatrick, deceased:

In pursuance of a decree of the Circuit Court of the County of Pocahontas, made in a cause therein pending, to subject the real estate of the said J. W. Kirkpatrick, to the payment of his debts, you are required to present your claims against the estate of the said J. W. Kirkpatrick, for adjudication to N. C. McNeill, Commissioner, at his office in the said county, on or before the 8th day of August, 1924.

Witness D. C. Adkison, Clerk, of the said Court, this the 23rd day of June, 1924.

D. C. Adkison, Clerk

**Administrator's Notice**
